Dear REU Program Directors,

I hope your REU summer program is going well!

I am writing to make you and your REU students aware of the 13th annual Southern California Conference for Undergraduate Research (SCCUR) being held at the University of California, Riverside, November 19, 2005. This may be a perfect opportunity for your students to present their faculty-mentored summer research to a group of their peers.

This multidisciplinary conference regularly attracts over 1000 undergraduates and their faculty mentors for a one day meeting. It is designed as a "first" conference experience. Students make either oral or poster presentations. The National Science Foundation understands the value for students who present their research and are co-sponsoring SCCUR this fall at UC Riverside.

Please see the attached conference poster and share this opportunity with your summer program. Encourage those students particularly with home institutions in the Southwest to register for this event. The conference web page may be accessed at

<http://sccur.ucr.edu>

If you have any questions or would like a conference poster mailed to you please contact me directly.

Best,

Chris Foster  
Conference Chair
